1. Introduction

ManGo is an application that works on your mobile fone. fonoinfo's ManGo allows you to add fun stuff to your mobile fone and make it different from others. You can find and request new ringtones. Also, hundreds of other goodies will be available soon such as games, logos, picture messages and much more. With ManGo you can browse and download the latest goodies directly from your mobile fone when on the move or while having fun with your friends. ManGo allows you to scroll and click until you find a goody that you like and you can then order it form your mobile fone directly.

ManGo is a standalone application that works on your mobile fone. It does not require permanent WAP or GPRS connectivity to view the information. You can connect every once in a while to download the list of new and updated applications. The information is then stored on your mobile fone and can be accessed offline. ManGo is free, i.e. you only pay for the goodies you order. Even when you run out of credit points, you can still browse through ManGo.

2. Feature Summary

- ManGo allows you to browse and order fun stuff directly from your mobile fone.
- Since ManGo works on your mobile fone, it offers you true mobility and freedom to dress up your mobile when on the move, while having fun with your friends, on the beach, in a café or anywhere else.
- With ManGo you can make your mobile fone different with the latest ringtones and much more.
- Scroll and click menus make ManGo very easy to use.

- With ManGo, you don't need to have permanent WAP or GPRS connectivity. You can connect every once in a while to download the list of new and updated applications. The information is then stored on your mobile fone and can be accessed offline.

3. ManGo installation

ManGo can be installed on your mobile fone in one of the following ways:

1. Installation via Infrared: Point your mobile fone's infrared port at your computer's infrared port and use the software that comes with your mobile fone to upload ManGo.
2. Installation via cable: If your mobile fone comes with a data cable, connect your computer to your mobile fone and use the software that comes with your mobile fone to upload ManGo.

If you still can't upload the application to your mobile fone, please see your mobile fone user manual or visit your mobile fone manufacturer's home page.

Once ManGo has been installed on your mobile fone, please complete the quick registration process which prompts you to enter the fone number where you will receive the items you order and other information. ManGo will then send the information to the server through a WAP/GPRS session¹.

4. Finding Items and Navigation

To run ManGo, please go to the menu where you can run java Applications on your mobile fone. To find out how to open Java applications see your mobile fone manual or visit your mobile fone manufacturer's home page.

¹ The registration process is not required in Little ManGo

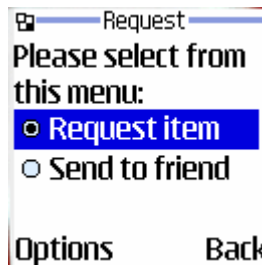

- When you first run ManGo, you see the following welcome screen (image may vary depending on the mobile fone type)

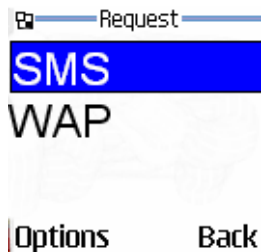

- The following screen appears. Select “fonoinfo Products” to view the available goodies.

- After you select the goody, you will receive the following “Request” Screen where you can request the item to be sent to you or you can request it to be sent to your friend.

- ²Select the method by which you would like to request the goody. You can either request the goody by sending an SMS command to a phone number or you can request it by connecting via WAP/GPRS.

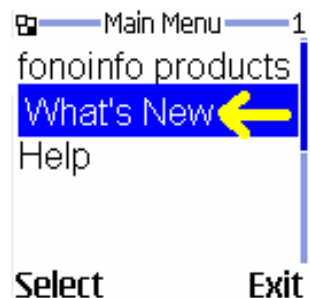

² Please note that this menu is not available in Little ManGo

- Make sure to enter your mobile fone number or your friend's mobile fone number in international format. For example if:
Country: Egypt (20)
Mobile operator: Mobinil (12)
Mobile fone number: 4567890
The number in international format would be: 20124567890
Do not add any spaces, numbers or zeros.

5. Updating Catalog Information

³In order to update the catalog information on ManGo, from the Main Menu, select “What’s New”. This menu will start a data session and will download all the new catalog information and application list to your mobile fone memory. This may take a while depending on the data line speed between your fone and your mobile operator. The downloaded information is then stored on your mobile fone and can be accessed offline. When you restart ManGo you will be able to browse through the updated information.

6. Getting Credit Points

ManGo is available for **FREE** download. To be able to request goodies such as ringtones from ManGo to your mobile fone, please add credit points to your account. To find out where to add credit points, please check the “Help” > “Get Credit” menus on ManGo or visit

³ Please note that this menu is not available in Little ManGo

<http://www.fonoinfo.com/credit>

7. Support

If you need help with ManGo, from ManGo's main menu, select "Help". To get in touch with fonoinfo for support, please visit:
